Hawaii Family Touchstones

Throughout history and across cultures, people have recognized the significance of the family. Despite the clear importance of families, we know surprisingly little about them.

Based on selected, relevant, and measurable indicators that could be tracked over time, the Center on the Family developed Hawaii Family Touchstones to provide an overview of Hawaii's families.

This report captures previously unavailable information about the well-being of Hawaii's families and the quality of their family interactions and relationships. A survey of Hawaii's families was conducted to get a picture what our families value and how they act on their beliefs.

The report provides encouraging news regarding the strengths of Hawaii's families. It also points to areas where our families need to be supported.
